INSTALLATION MANUAL

-OLEO4 TRACK/SINGLE LAYER

Final

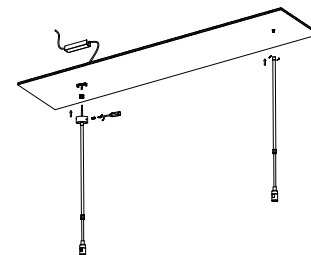

Materials

- ① Feeder with cable × 1PCS
- ② Holder × 1PCS
- ③ Adjustable pole × 2PCS
- ④ Ceiling plate × 2PCS
- ⑤ Track × 1PCS

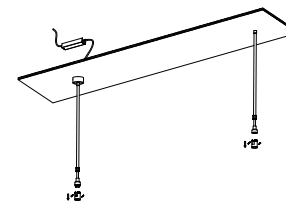

Remarks 1 : insert the cable of the feeder through the adjustable pole, then twist on the feeder with the pole, as well as the holder.

1. Make the hole for the electricity wire and mark the position where we want to install the track

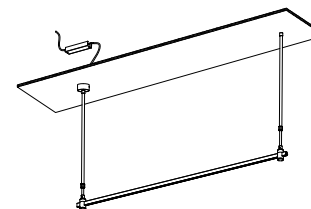

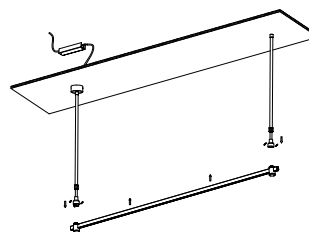

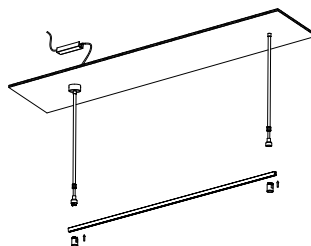

2. Install the power supply on the ceiling and keep the wire out the hole, fix the bracket of the ceiling plate and pole nut on the ceiling

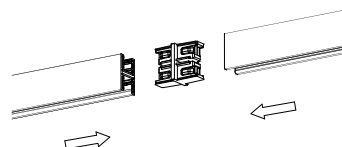

3. Connect the cable to the power supply, fix the pole A & B (which is installed as the drawing in the left) on the ceiling, then adjust them on the same height and fixed

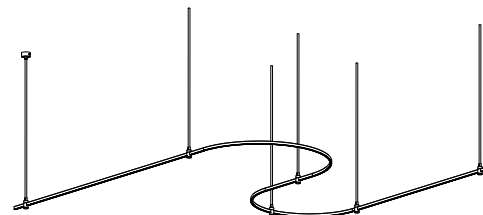

4. Twist off the main part of the feeder and holder

5. Twist on the main part of each holder back with track, and put on the end caps

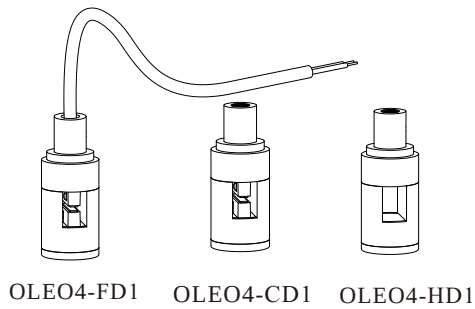

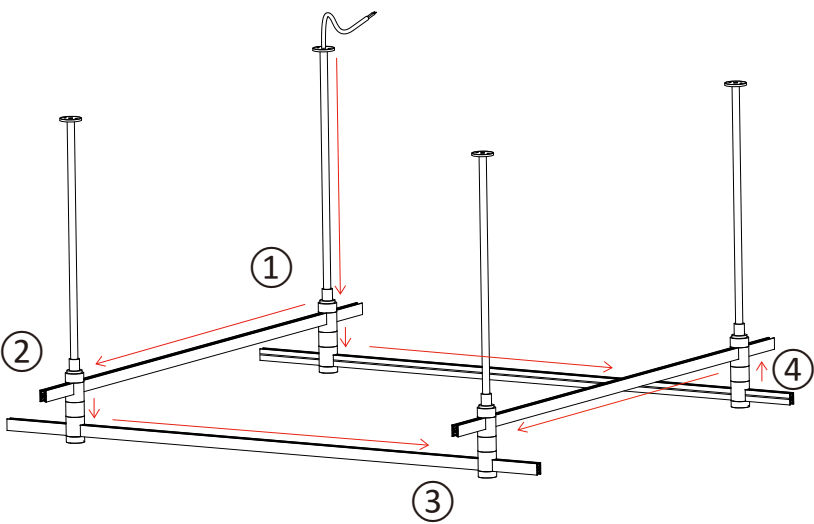

Remarks 2: Connect the tracks with the connector to make variety designs if needed
